

Hi everyone! Laura here. I donated my right kidney to a stranger through the NKR on December 7, 2023. Before I donated, I didn't know much about kidney donation, but I knew how lifesaving transplants can be. As a nurse, I worked with pediatric liver transplant patients and saw how their lives changed once they had a healthy liver. I donated to honor two of the patients I cared for. I have since decided to get my Nurse Practitioner license to continue working with donors and transplant patients.

I never imagined the opportunities or the incredible people I have met since my donation. When I'm not in school or at work, I love to hike with my dog, Sadie, spend time with my adorable nieces, read, and cross-stitch. I am looking forward to showing people that you can do anything with one kidney that you can do with two!
