

Kristie Sue Hathaway Bio-

In 2021, I donated one of my kidneys to a stranger. The experience had such a profound and positive impact on my life that I knew I wasn't done giving. In 2024, I donated a portion of my liver to another stranger.

Today, I continue to live an active, healthy life after both donations. I run, cycle, hike, and, since donating, I've even taken up the sport of ninja. My experience has shown me that living organ donation doesn't have to mean giving up the activities you love.

If I had the opportunity to donate again, I would do it in a heartbeat.
